

Apprenticeships

Aidan Procter was at Lakes College when the apprenticeship opportunity at TSP Engineering arose. Aidan is nearly at the end of a Level 3 Advanced Machinist apprenticeship.

In his own words, Aidan says “I enjoy learning to operate machines – I enjoy everything about my job.” It’s always good to hear that our apprentices enjoy working at TSP Engineering.

Aidan has found that alongside learning how to work the machines, he has also found the experience useful when reading technical drawings – something which he had previously struggled at when he was at College.

Not every apprentice can say that they have been on the front cover of a magazine but Aidan can! Although he has described himself as “quiet and that he does not enjoy being the centre of attention”, in 2017, he was photographed to be on the front page of the Manufacturing and Engineering magazine who had produced a feature on TSP Engineering and our capabilities.

Aidan Procter

AIDAN IS CURRENTLY WORKING ON THE G60 HORIZONTAL BORING MILL AND IS WORKING ON COMPONENTS FOR PROJECTS FOR SELLAFIELD. AT THE END OF HIS APPRENTICESHIP HE IS HOPEFUL FOR A FULL TIME POSITION AT TSP ENGINEERING AND IS LOOKING TO FURTHER ADVANCE HIS LEARNING.
