

Apprenticeships

Brent Farrington is nearing the completion of a Level 3 Advanced Machinist Apprenticeship. He initially wanted to become a plumber and applied for an apprenticeship as a pipefitter or a machinist. He was successful in gaining an apprenticeship as a machinist and is happy to be offered the opportunity.

When speaking to Brent, it is apparent he is a very down to earth, confident and motivated individual. He speaks highly of his apprentice coordinator who he describes as “a very good motivator.” Brent is currently working on the G50 and G60, both of which are horizontal borers, and is working on Sellafield projects. He has especially enjoyed learning how to operate the CNC (computer numerical control) machines.

“I would definitely recommend an apprenticeship at TSP Engineering” says Brent, “I work with a good group of lads, its local to home and I enjoy my job.”

Brent Farrington

BRENT DESCRIBES WORKING AT TSP ENGINEERING AS “IT’S CLASS.” HE IS PROUD OF THE SKILLS HE HAS ACHIEVED DURING HIS APPRENTICESHIP SO FAR, WHICH STARTED OUT BY EARNING A TOP 3 POSITION IN THE GEN2 APPRENTICE CHALLENGE.
