

Apprenticeships

Kieran was at GEN2 just two days per week when he was approached by TSP Engineering to attend an interview with the purpose of being offered an apprenticeship as a Level 3 Advanced Machinist.

Kieran is described as being a very able, keen apprentice. He is currently working the day shift but when he has completed his apprenticeship, he will be working on a shift basis, something that he is looking forward to.

Kieran is enjoying working on a number of lathe machines, including a DSG (Dean Smith and Grace), he is particularly keen to experience all the machines and is speaking to his apprentice coordinator to draw up a programme so that he gets the required experience.

At present, Kieran is working on projects for our client, TATA Steel.

Kieran Moore

KIERAN THINKS THAT THE APPRENTICESHIP SCHEME IS A BRILLIANT OPPORTUNITY, "YOU GET TO LEARN A TRADE WHILST BEING PAID – IT KEEPS ME BUSY AND OCCUPIED AND I FEEL LIKE I'M MAKING A CONTRIBUTION TO THE BUSINESS".
