

Apprenticeships

Kyle Branson

“IT KEEPS THINGS FRESH!”

KYLE ENJOYS THE VARIETY WITHIN HIS ROLE IN THE PROCUREMENT DEPARTMENT AT TSP ENGINEERING. HE SAYS “IT GIVES ME PLENTY OF VARIETY BOTH IN THE OFFICE AND IN THE STORES.”

Kyle is in his 2nd year of an NVQ Level 3 Extended Diploma in Engineering Technical Support and works within the very busy Supply Chain / Procurement department. He integrates his coursework with his very varied job role taking evidence as he goes along.

When making the decision to become an apprentice, Kyle considered the invaluable experience and skills he could gain. “I’ve always wanted to learn how to do a job, not just learn with no real experience, I wanted to gain on the job experience” says Kyle, “I wanted to improve my social skills and my ability to work with others.”

Before starting work at TSP Engineering, Kyle says “I was terrified of the thought of making a phone call and would procrastinate whenever I had to. I have become much more confident over the phone since when I first started, I just needed to jump in at the deep end.”

Colleagues have also noticed Kyle’s increase in confidence and social skills together with an increase in his general engineering knowledge – he credits working in the busy Supply Chain area of TSP Engineering as certainly contributing to that.

Kyle’s main duties are the procurement of materials and items as well as material control. Kyle says that “with the knowledge he has attained and is still attaining over the years, he aspires to be a Material Controller or a Material Source Lead within TSP Engineering.
