

Apprenticeships

Rebecca Beattie

“MY CONFIDENCE HAS IMPROVED THROUGHOUT THE COURSE OF MY APPRENTICESHIP, BOTH AT GEN2 AND AT TSP ENGINEERING. A BIG PART OF MY GROWING CONFIDENCE HAS BEEN GETTING TO KNOW AND UNDERSTAND MY ROLE AND THE MORE I DEVELOP MY KNOWLEDGE, THE MORE CONFIDENT I AM TO TAKE ON TASKS ASKED OF ME.”

Rebecca is currently in her third year of an EAL Level 3 NVQ Extended Diploma in Engineering Technical Support. She is based in the Commercial department and aspires to establish herself as a valuable commercial apprentice team member, progressing within the business, achieving a permanent position which suits her skills.

TSP Engineering apprentices start their apprenticeship by rotating through the departments within the business and it was during this initial phase that Rebecca found herself very comfortable within the Commercial department. She has gained the confidence to communicate at all levels and to liaise with clients.

Rebecca’s day to day duties involve handling tender enquiries that may be of interest to the business. “I am involved with evaluating technical information provided by the customers to determine whether the enquiry is suitable for further progression” says Rebecca, “if the enquiry is suitable for progression, then I am involved in the bid writing process, collating information from different areas of the business and evaluating the success criteria of a proposal and highlighting areas of focus”.

Rebecca is the first apprentice that the Commercial department have experienced and is one they are keen to progress further. She is a valuable member of the team who has played a key role in the completion of a number of high value Proposals during her time with the business.
